

ANYANWU FRANCIS JNR

Backend Developer (Python) | Full-Stack Enthusiast

✉ francisanyanwuchu@gmail.com | 🌐 github.com/001grindpa | ✂ x.com/0xgrindpa | 📍 Port Harcourt, Rivers, Nigeria

SUMMARY

Backend-focused developer skilled in Python (FastAPI, Flask) with experience building real-world web applications and AI-powered tools. Strong in designing RESTful APIs, working with databases, and integrating modern AI frameworks. Passionate about solving problems and delivering clean, efficient, and scalable solutions.

SKILLS

📄	Languages	: Python, JavaScript, SQL
🖥	Backend	: FastAPI, Flask, SQLAlchemy, LangChain, LangGraph
🖥	Frontend	: HTML, CSS, JavaScript
🗄	Databases	: MySQL, SQLite3
🔧	Tools	: Git, Docker
🚀	Other	: Learning Solidity
💬	Languages	: English (Fluent)

PROJECTS

DPA Web App

Personal Growth Application

- Built a full-stack web application using Flask, JavaScript, HTML, and CSS.
- Designed a system to help users build consistency through small, meaningful habits (Daily Positive Action).
- Used SQLite3 for lightweight and efficient data management.
- Deployed with Docker for consistent and scalable environments.

Steve

Interactive AI Cook Agent

- Developed an AI agent using LangChain and LangGraph to suggest recipes based on available ingredients.
- Built as an improved second-generation model of an initial prototype.
- Implemented a FastAPI backend with MySQL for robust data handling.
- Designed a responsive frontend using HTML, CSS, and JavaScript for a smooth user experience.

EDUCATION

University of Port Harcourt (UNIPORT)

Bachelor of science in Biochemistry

Port Harcourt, Rivers, Nigeria

(2018 – 2023)

ADDITIONAL

✍	Writing	: Skilled in technical writing and content creation.
📖	Interests	: Building APIs, AI tools, Web3, and Open Source.
🎯	Currently Learning	: Solidity, Blockchain Development.
